

Thermocouple Brake Pad Temperature Sensors - JIS Type K - 3.2mm diameter

Labfacility are the UK's leading manufacturer of Temperature Sensors, Thermocouple Connectors and associated Temperature Instrumentation and stockings of Thermocouple Cables. The Company has been trading since 1971 and is ISO9001 accredited.

Datasheet

These thermocouple sensors are to be used to monitor the temperature of brake pads up to +400°C. They are designed to be embedded into the pads.

Each sensor has 1m of fibre glass insulated cable, with stainless steel Overbraid. Available in thermocouple type K and with a choice of tip diameters. Each tip is sealed with a high temperature ceramic paste (Fortafix) which can withstand temperatures up to +400°C.

Specifications

Specifications

Product Code	XE-0601-001	
General Description	Designed for monitoring the temperature of brake pads	
Sensor Type	Grounded Junction	
Thermocouple Type	K JIS	
Probe Diameter	6.0mm	
Cable Length	1m	
Cable Type	Fibre glass with stainless steel Overbraid 7/0.2mm	
Termination Type	Bare Tails	
Max. Temperature	400°C	
Standards Met	JIS (Japanese Industrial Standards)	
Colour	Positive: Red / Negative: White	
Important Information	Potting sealant: Ceramic paste (Fortafix)
